

Meet Haengeun

Transcription

My name is Haengeun and I work in the financial modelling team. My normal day would vary from coding and maybe building website designs or an app. Using technology to help solve IT issues, or any business problems they may have. It's a very intensive programme, designed to help you learn the technical skills and all the soft skills that's required to be successful. KPMG is great at helping me keep my work-life balance. There's a culture of supporting each other. I really enjoy working at KPMG, it's a place where I can excel.
