

# Technology & Engineering– Financial Modelling

## In-depth Guide

### Technology & Engineering - Financial Modelling

As a graduate, you'll work with a range of clients on projects which span our various service offerings, giving you the chance to build your modelling skillset and apply your financial knowledge. During the programme, you'll benefit from a number of training modules designed to develop your productivity and technical skills. As you progress, your Performance Manager will work with you to identify your goals and tailor any additional training you might need. We will provide plenty of support and a blend of development opportunities to help you achieve your potential – including client work and the chance to gain financial qualifications specifically suited to the work you will deliver.

### Coverage Areas you might work in

You will add value to our clients and business from day one. No two projects will be the same, so you'll need the flexibility to work across different roles with a diverse range of people and clients. We work across three coverage areas: Financial Services, Corporates and Infrastructure, Government & Healthcare.

#### Financial Services (FS)

We help banking, insurance and investment management clients use advanced modelling techniques to make better decisions.

#### Corporates (Corps)

We have clients in sectors as diverse as Aerospace & Defence, Life Sciences, Industrial Manufacturing, Energy, Technology Media & Telecoms, Consumer Markets, Leisure and Retail. We provide tools to help our clients confidently address strategic and operational challenges.

#### Infrastructure, Government & Healthcare (IGH)

We have clients in areas as diverse as Infrastructure, Transport, Justice, Security, Education and Health that operate in all of the regions across Great Britain. We help clients analyse options, plan and appraise high-value bids, and optimise resource allocation.

Regardless of coverage area, you will get to work on a broad variety of projects in different industries and will be able to work with other parts of the firm such as Transaction Services, Corporate Finance, Restructuring, Tax, Financial Risk Management and Audit, on some of the most exciting and high profile projects in KPMG.

This exposure provides access to the unrivalled knowledge you need to build your own skills, as well as deliver to our clients. Learning and applying the latest technologies, you'll be expected to pick up essential information quickly about the UK firm and industry that you're working in, as well as the basics of Financial Modelling. The three coverage areas work closely together and so regardless of which coverage area you are part of, you will likely find yourself given the opportunity to work for the other areas during the graduate programme.

### **Why Financial Modelling?**

As one of the fastest growing areas of KPMG, it's a great place to develop your modelling and analytics skills, business understanding, consultancy skills and career. The breadth of our work, expertise and clients means there's always the chance to learn new things. We'll also provide a strong support network for you to maximise every opportunity that comes your way.
